QASIM ALI

Full Stack Developer | QA & Software Testing Intern

Islamabad, Pakistan | +92 310 8028536 | qasim.aliii019@gmail.com | github.com/Qasimali-019 | linkedin.com/in/QasimAli

PROFESSIONAL SUMMARY

Computer Science student and full-stack developer with hands-on, production-grade experience building live software for paying clients, combined with current QA and software testing internship experience. Proficient in Node.js, Express.js, React.js, PostgreSQL, and REST API design, with strong OOP fundamentals across JavaScript, TypeScript, C++, and Java. Experienced in end-to-end delivery, including system architecture, database design, authentication/RBAC, and bug verification.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Java, C#, HTML5, CSS3
Frameworks: Node.js, Express.js, React.js, Tailwind CSS
Databases: PostgreSQL, MySQL, MSSQL, SQLite, Redis
Tools & Practices: Git, GitHub, Docker, JWT, REST API, QA/Software Testing, Bug Tracking, Vercel, Netlify

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern (QA & Development) — Outscalers Pvt Ltd Jul 2026 – Present
Rawalpindi Saddar, Pakistan (On-site)

- Perform QA and software testing of web applications, covering test modules, workflows, user roles, and permissions.
- Identify, document, and verify bugs and fixes; analyze requirements to confirm fixes align with expected application behavior.
- Contribute to full-stack development on live projects under team guidance, strengthening front-end and back-end skills through hands-on delivery.

Full Stack Developer — Sole Developer — superchina.pk (Client) Jul 2024 – Sep 2024
Quetta, Pakistan

- Sole developer on a live, production-grade POS and inventory management platform for a paying business — delivered on time with zero supervision.
- Built real-time backend in Node.js, Express.js, and MSSQL handling livestock reconciliation, revenue calculations, COGS tracking, and RBAC for Admin and Cashier roles.
- Developed a refund engine that automatically reverses inventory, revenue, and profit in real time, preventing duplicate refunds by locking processed bills.

Stack: TypeScript, React.js, Node.js, Express.js, MSSQL, REST API

Full Stack Developer — Sole Developer — dollarquetta.online (Client) 2025 – Present
Quetta, Pakistan

- Sole developer on a second live POS and inventory management platform, mirroring the scope of the superchina.pk system on an independent tech stack.
- Designing and building backend and frontend architecture with Node.js, React.js, and PostgreSQL; currently extending the platform with an integrated e-commerce storefront (in development).

Stack: React.js, Node.js, Express.js, PostgreSQL, REST API

Full Stack Developer — Sole Developer — Siratul Mustaqeem (Client) 2026 – Present
Islamabad, Pakistan

- Architecting a full Islamic guidance and community web app from scratch — designed system architecture, UX wireframes, React/TypeScript component hierarchy, and a fully normalized PostgreSQL schema.
- Engineered secure authentication, session management, RBAC, and activity feeds; applied advanced React patterns including custom hooks, Context API, and lazy loading.

Stack: React.js, TypeScript, Node.js, Express.js, PostgreSQL, REST API

NOTABLE PROJECT

Event Bookings — Smart Event Management Platform March 2026

- Production-ready platform supporting in-person, virtual, and hybrid events with ticketing, attendee check-in, and post-event analytics.
- Built a workflow automation engine triggering email/SMS via SendGrid and Twilio; implemented Redis caching, rate limiting, and four-tier RBAC (User / Admin / Organizer / Host).

Stack: React.js, Node.js, Express.js, MongoDB, Redis, JWT, REST API

EDUCATION

B.Sc. Computer Science — Air University, Islamabad Sep 2023 – Jun 2027
Relevant coursework: Data Structures & Algorithms, OOP, Database Systems, Software Engineering. Self-directed learner: independently adopted Node.js/TypeScript, and PostgreSQL outside the formal curriculum.
